

Lexicomp™ Database

Creating the Safe Label System® Drug Formulary

Creating the formulary for your Safe Label System is the essential starting point of safe medication management. A one-year subscription to the Lexicomp Basic Drug Database is included with each SLS 500i® Point of Care Station (PCS). The Lexicomp subscription includes quarterly updates that are pre-packaged for your SLS systems to ensure your formulary is just a click away from the most up-to-date drug data.* Each Lexicomp database provides FDA-approved drug information.

This helps you jump start your formulary creation and enhances maintenance by simply selecting from thousands of drugs and hundreds of manufacturers already loaded in the SLS Administration Tool. With SLS, you can easily compile a formulary that includes your hospital-approved drugs, merged with your hospital policies, professional best practices, local laws and internationally recognized standards to establish a reliable, comprehensive database that makes maintenance incredibly simple and straight-forward. SLS prepared labels are linked to your formulary, your "source of truth."

KEY FEATURES

Advantages of the Lexicomp Database

- Provides users confidence that your formulary data, the known "source of truth," is safe, current and reliable
- Create and maintain formularies in record time using quarterly releases of the Lexicomp Basic Drug Database
- Adds pharmacy oversight at every location where on-demand medications are prepared to deliver safe and predictable results
- Codonics offers annual and multi-year subscriptions of Lexicomp database updates*
- Each release is evaluated specifically for use with the Codonics Safe Label System to ensure ease of use

* This database is licensed only for SLS.
